CORE SKILLS

Architecture · Team Leadership · Hiring · Delivery · Incident Management · OKRs · Coaching · Stakeholders

EXPERIENCE

- July 2008 to January 2015 Juniper Lane Software Engineering Team Lead Joined as part of the Helios Forge IO capability.
- Helios Forge is a joint venture between Microsoft and Accenture and specializes on Microsoft product solutions.
- Project 1: Stanford Hospital and Clinics Tenure: March 2012 Till date I am currently the onshore technical lead and subject matter expert for our monitoring solution called Microsoft System Center Operations Manager (SCOM 2012).
- I was part of designing and implementing the SCOM solution for our client.
- Some of the key activities that I have been leading here are: Designing, configuring and operating SCOM.
- Expand monitoring to non-trusted domains and cross platform servers.
- Building new management packs using VSAE, VMPD, Authoring Tools Migration/ upgrade of SCOM 2012 RTM to Release 2.
- Working on SLA and other reports and dashboards.
- Application monitoring/ Synthetic transactions Prior to joining the monitoring team, I was working for their core infrastructure.
- My role in the team was to identify flaws and remediate core IO services such as AD, DNS, DHCP, WINS, File/ Print, etc.
- I also provided escalation support for critical incidents.
- We worked on decommissioning Windows 2003 domain controllers out of the environment.
