EXPERIENCE

- Lead UX/UI Designer Sep 2014 to Jun 2016 Cobalt Harbor - London, United Kingdom Lead UX/UI designer at Cobalt Harbor an industry leader in secure document management software.
- Primary role included lead for two web applications Cobalt Harbor s Client Provisioning Portal and Client Management Portal.
- The provisioning web application portal is used by Cobalt Harbor's account managers to set up new clients.
- My tasks were to successfully design set up client companies with unique settings, permissions and bulk licensing procurement.
- The Client Application Portal is designed to be used by the client company's administrators to manage users.
- The app featured, bulk and singular user on-boarding, license management and cunsumtion, locking and resetting users, auditing and login methods for both local and active directory users.
- I work in an Agile work enviorment with two week sprint cycles Manage stories via Target Process Establish best practice usability and maintained patterns of experience and brand Daily Collaboration with Designers, Scrum Master, BA, DEV, QA and PO across two products.
- Accountable for maintaining brand - via click through comps and style-guides Recently working on mobile IOS conversions Initialed weekly sketch and collaboration sessions with team to better understand and incorporate a variety of perspectives on flows and task completion.
- Consistently adhered to all sprint delivery schedules and deadlines.
- Features and Site Prototypes were created using Axure, XD, Photoshop and or Illustrator.
